

Job Announcement

Utah Conservation Corps & USFS Ashley National Forest

Archaeology Crew / Technician

Apply by: **April 17, or until filled up to May 15, 2020**

Position Location: 355 N Vernal Ave., Vernal, UT

The Utah Conservation Corps (UCC) in partnership with the Ashley National Forest is advertising for an **Archaeology Crew / Technician**. This position offers approximately 4 months (15 to 17 weeks) of full-time work experience beginning in early June 2020, dates negotiable. The Utah Conservation Corps (UCC) is Utah's award-winning, and nationally-recognized statewide Conservation Corps headquartered in Logan, Utah at Utah State University's main campus. The UCC has been Utah's largest environmental AmeriCorps program since 2001, completing service work on public lands, in communities, and with various organizations throughout the state. UCC will recruit and hire the selected RA candidate providing personnel and Human Resources (HR) needs during the placement. <https://ucc.usu.edu/>

If you have questions about this Archaeology Crew / Technician position, please contact Jeffrey Rust, Heritage Program Manager, Jeffrey.rust@usda.gov, 435-781-5156, or Amber O'Quinn of the Utah Conservation Corps, amber.oquinn@usu.edu, 206-554-1270.

The Position

The position will be located out of Vernal, Utah.

An Archaeology Technician performs developmental assignments in support of the Heritage program on the Ashley National Forest.

Archaeology technicians will gain experience in all facets of cultural resource Section 106 compliance by working on a variety of archaeological survey projects and archaeological pedestrian surveys. A portion of the time will be spent helping to prepare archeological site documentation from field surveys and assisting with the preparation of reports about the nature and extent of known cultural resources.

This is a field-going position with a majority of time spent in a forest setting under a variety of weather conditions, often traversing steep uneven terrain. Field work will typically be conducted with a crew of two or more. Access to work sites will be by four-wheel drive truck and backpacking. Some survey locations may involve a limited amount overnight camping. Must be able to hike up to 10 miles per day in rugged terrain carrying a 30 lb. backpack. The ability to navigate by a map and gather and download field GIS data on a hand held professional grade GPS unit is essential.

Program Benefits

- \$16.73/hour along with health care coverage (if needed), workers compensation, and FICA/Medicare.

Position Requirements

- Must be a degree seeking student in archaeology or have a degree in archaeology (or anthropology with an archaeology emphasis).
- Preference given for field experience in archaeology (archaeological pedestrian survey or excavation) in the Intermountain West.
- Valid driver's license and good driving record. Drive government vehicle as required for position.
- Must successfully pass a fingerprint criminal history background check.
- U.S. citizen, national or lawful permanent resident.
- Regular and reliable attendance and dependability.
- Strongly prefer experience in working outdoors
- Excellent written and oral communication skills.
- Excellent organizational and computer skills. (prefer experience in data entry, use of GIS ArcMap software and familiarity with Trimble GPS equipment.)
- An independent, self-motivated, creative, and resourceful individual able to work with diverse groups of people.
- A cooperative manner and the ability to serve as part of a team, but the ability to work independently. Work a flexible schedule, including 10 to 12 hour days on occasion.
- Ability to commit to a 10-week minimum term of service.

The Ashley National Forest

<http://www.fs.fed.us/r4/ashley/>

The Ashley National Forest encompasses about a million and a half acres in northeastern Utah and southwestern Wyoming. The Forest lies in three geographical areas: the east-west range of the Uinta Mountains, the Green River Basin, and the Tavaputs Plateau. Elevations range from 6,000 feet to 13,528 feet.

Steep canyons, high mountain peaks, glaciated basins, large open meadows, and desert badlands produce a rich diversity of vegetation and wildlife. The grasses and shrubs of the high mountain desert are replaced by pinyon and juniper as the elevation rises. In mid-elevation areas, aspen dominates and becomes mixed with conifer. Higher up, the vegetation changes to conifer forest composed of ponderosa pine, lodgepole pine, fir, and spruce. Wildlife is abundant. Larger species include black bear, mountain lion, moose, elk, mule deer, pronghorn, mountain goats, and bighorn sheep.

Neighboring lands include the Uinta and Ouray Indian Reservation to the south, the Uinta-Wasatch-Cache National Forest to the west and north, and a mixture of Bureau of Land Management, State of Utah, and private lands to the east and southeast. Compared with other National Forests, relatively few small tracts of private land lie within the Ashley's boundary.

The High Uintas Wilderness, established by Congress in 1984, comprises nearly one-half million acres in the Uinta-Wasatch-Cache and Ashley National Forests. Within the wilderness, elevations range from 8,000 feet to 13,582 feet at the top of Kings Peak, the highest mountain in Utah. The Uinta Mountain range runs east to west, from the Wasatch Mountains into Colorado. Pre-Cambrian rock formed from sediments laid down 600 million years ago makes up the core of the range. Glacial activity carved deep canyons and left a spectacular landscape of rolling, treeless peaks and stratified ridges interspersed with broad meadows and numerous lakes.

The Flaming Gorge National Recreation Area lies in the northeast part of the Forest. Flaming Gorge Reservoir extends almost 90 miles into Wyoming, and offers outstanding fishing and boating opportunities. Record-breaking German brown trout and large lake and rainbow trout have been taken from its waters. The Flaming Gorge National Recreation Area has three marinas and many campgrounds, some of which are open year-round.

The Green River below Flaming Gorge Dam is a world-famous blue-ribbon trout stream. The Little Hole National Recreation Trail parallels the river 7.3 miles from the Dam to the Little Hole Recreation Complex.

About Vernal, Utah

Vernal is situated in northeast Utah south of Flaming Gorge National Recreation Area and west of Dinosaur National Monument, and is the county seat of Uintah County. Vernal has a population of approximately 10,000 people. When combined with the residents of surrounding communities, the population of the Ashley Valley is approximately 15,000. Vernal is 180 miles east of Salt Lake City and 300 miles west of Denver.

Climate

Vernal sits at approximately 5,000 feet above sea level. Vernal enjoys four beautiful temperate seasons; the climate is semi-arid with low humidity. Annual precipitation averages 15-20", mostly in the form of winter snow and spring/fall rain. Winter temperatures usually hover in the 20s -30s during the day, but will occasionally drop to sub-zero. Mid-summer temperatures can reach 100 degrees, but generally average in the low-mid 90s, dipping into the 50s at night.

The U.S. Department of Agriculture (USDA) prohibits discrimination on all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 14th and Independence Avenue, SW, Washington, DC 20250-9410 or call (202) 720-5964 (voice and TDD). USDA is an equal opportunity provider and employer.
