The background of the top half of the page is a photograph of a person in a field. The person is wearing a dark jacket and a light-colored backpack, and is standing in a field of dry, yellowish-brown vegetation. A large, bright orange fire is burning in the foreground, partially obscuring the person. The fire is intense and appears to be spreading across the field. The overall scene suggests a field study or a controlled experiment in a natural environment.

ANTHROPOLOGY ARCHAEOLOGICAL SCIENCE EMPHASIS

EMPHASIS DESCRIPTION

This emphasis is designed to prepare anthropology majors for careers in the growing fields of private-sector archaeological and environmental consulting. It is explicitly designed to train students in the science of archaeology, including basic surveying technologies involving geographic information science (GIS), and theoretical/statistical modeling.
