We are seeking participants for the 2020 Summer Archaeological Field School (ANTH 5712), which will be held at the Range Creek Field Station, east central Utah. Students earn 8 credits while engaging in hands on training in archaeological method and theory through excavation, survey, and experimental research.

**Dates:** **June 08-July 29, 2020** (four 10-day sessions with 4 day breaks in SLC between sessions).

The Field School, directed by Dr. Shannon Boomgarden, is part of an ongoing field research project sponsored by the Natural History Museum of Utah and Department of Anthropology, University of Utah. The project is focused on investigating foraging and maize farming productivity, prehistoric irrigation techniques, storage strategies, and settlement patterns of the Fremont inhabitants of Range Creek Canyon 1,000 years ago.

**Fees and How to Apply**

The Field School is limited to 12 students. Students will pay tuition costs (resident tuition rates apply for summer courses) for 8 credit hours. Students pay a special fee of $700.00 for meals and transportation from SLC to the Field Station. Students must provide their own toolkit and personal camping gear.

**Application deadline:**

**MARCH 1ST**
